

## Skid Fabrication

### Skid mounted Systems

We fabricate skid mounted systems acc. to customer specifications and drawings in our works in Bremen.

Steel constructions, pipe spools and the complete assembly and testing is done in house.

Electric wiring surface treatments, corrosion protection and seaworthy packing is arranged as well.

Testing of components and FAT of the complete system is carried out partly in cooperation with independent inspection companies in accordance to international standards.

### Facilities

Door openings and hoisting facilities are the limitations for the size of the modules.

We can offer a weight of max. 10 tons and a length, width, height of 12 x 3 x 4 m.

Quality, In house testing, inspected and approved Functional tests, leakage and electrical tests are performed in our works. Items fabricated by us are inspected and NDT controlled. We also offer precise measurement by a FARO measuring gauge. Independent third parties are available to witness and confirm the tests.

### Quality Management

Processes are monitored and running acc. to a quality management system acc. to ISO 9001:2015 approved by DnVGL

### Approvals

Germanischer Lloyd for welding of pipes of all classes PED 97/23/EC / AD2000 HP0/R100  
DIN 2303-Q2-BK1
